mophie juice pack® **Made for the Samsung Galaxy® S III – User Manual**

Welcome

Thank you for purchasing the mophie juice pack for Samsung Galaxy SIII. You will now be able to travel great distances; be the master of your own destiny, no longer bound by the limitations of your phone's internal battery. Let's get juiced!

Package Contains

- mophie juice pack for Samsung Galaxy SIII
- Micro USB Cable
- User Manual

Features

The mophie juice pack extends the battery life of your Android™ phone for hours and provides a comfortable ergonomic design with the protection of a hard shell case.

Here's a rundown of why the juice pack air is so fantastic:

1. (Take a breath) Ergonomic, form-fitting, fully protective ultra-impact-resistant case-and-battery-in-one for your Android™ phone.
2. Integrated power switch allows you to put the juice pack into standby mode. Only use the battery when you need it. In standby mode (red), the juice pack still allows charge and sync capabilities through the micro-USB port and offers the complete protection of a case.
3. Uses breakthrough rechargeable lithium polymer battery. (Much safer than those troublesome lithium-Ion batteries).
4. State-of-the-art battery technology extends the life of your Android™ phone for hours... and you can even recharge it while it's still connected to the phone! This battery rocks.
5. Track battery power status at a glance with an integrated 4-light LED status indicator which shows charging mode and current battery life. Know before you go!
6. It's the included USB micro cable connection that allows you to charge and sync your phone while refilling your juice pack at the same time. Really, you don't ever have to disconnect the juice pack, though it's a snap when you do.
7. Rechargeable for over 500 cycles. (These are FULL cycles. Partial cycles don't count as full. So, you can charge your juice pack 10% of the way ten times before you get to a complete cycle. Don't be afraid to top it off.)

8. Smart battery technology actually instructs the phone to drain out the juice pack first. When you're done with the juice pack you can pull it off and still have a fully charged phone.

9. The juice pack offers complete protection from top to bottom. No more choosing between protection and power.

10. Built-in short circuit, over-charge and temperature protection. Safety First!

Compatibility

Though the juice pack for Samsung Galaxy SIII comes with a standard micro USB connector, this battery is intended solely for use with the Galaxy SIII phone. Please do not attempt to use the product with any other device - things could go haywire, but contact us if they do.

Charging your juice pack

Connect the juice pack to a power source using only the micro USB cable that came with your juice pack. The USB cable can be plugged in to your computer or any wall-plug style power source with USB out including the standard USB wall adaptor included with your phone. (The LEDs located on the back of the device will blink when charging, as the juice pack becomes more charged the LEDs will indicate how full it is, but one LED will remain blinking until completely full.)

Important

The juice pack comes charged and ready to go, but after the initial use, normal charging will take only 2 to 3 hours for maximum power – AND you can then charge it while the phone is inserted or separated.

Charging your phone using the juice pack

If your phone is drained of power or if you want to extend the battery life of your phone, simply slide the phone into the juice pack. Make sure that the connector is securely inserted into the top of the phone and the switch is turned "On" (green). When the phone recognizes the juice pack, a battery symbol will appear on the screen and you will hear a chirp from the phone; this indicates that the phone is charging and/or using the power from the juice pack rather than from the phone itself.

If your phone is drained of power, the juice pack will first charge your phone. If your phone is fully charged, the juice pack will act as your primary

battery and no power will be lost from the phone's internal battery until the juice pack is depleted. So you keep on talkin', rockin', surfin' and sendin'!

Checking the status of the juice pack

You are always in the KNOW! To check the battery status of the juice pack, press the button located on the back of the device. When pressed, the LED lights will illuminate for several seconds. Four LEDs means that the juice pack is fully charged, and one LED means that it is almost empty.

Switching your juice pack to standby mode

If you'd rather use your internal battery and not the juice pack, use the switch on back of the juice pack, to put it into standby mode. The dot near the switch will indicate whether the juice pack is in standby mode (red) or charging mode (green). When your internal battery is low, simply flick the switch "On" and your phone will begin charging immediately.

*Note: Using the standby switch will give you even more total battery life, as the phone uses additional power to be on a constant charge.

Sync with your computer without removing the juice pack

While connected to the juice pack, you can still sync your phone with a computer. Simply connect the included micro USB cable from the juice pack to the computer and sync your phone the same as if it was directly connected.

To keep your juice pack operating to its fullest potential, make sure to do the following:

1. Keep your juice pack dry and away from moisture and corrosive materials.
2. Do not wash the juice pack with harsh chemicals, soaps or detergents. Just wipe the case with a soft, water-dampened cloth. Wipe the pins gently with a soft, dry cloth.
3. Re-charge your juice pack once every three months when not in use, and remember to charge it for one hour before putting it away the first time.

Warranty

At mophie, we are dedicated to making the best quality products we can. To back this up, your mophie juice pack is warranted for 1 full year from the date of purchase (this warranty does not affect any statutory rights that you may be entitled to). Keep a copy of your purchase receipt as proof of purchase. Be sure to register your product at mophie.com to activate it and check for the latest product updates as they develop. Failure to register your product or to provide proof of purchase may void the warranty.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced technician for help.

CAUTION: To comply with the limits of the Class B digital device, pursuant to Part 15 of the FCC Rules, this device is comply with Class B limits. All peripherals must be shielded and grounded. Operation with non-certified peripherals or non-shielded cables may results in interference to radio or reception.

MODIFICATION: Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the device.

FAQ

What are the best methods for charging my juice pack?

Connect the mophie juice pack to a power source using the USB cable that came with your juice pack. The USB cable can be plugged in to your computer or any wall-plug style power source w/ USB out.

How many charge cycles do you get in the juice pack?

The juice pack is rechargeable for over 500 cycles (These are full cycles. Partial cycles don't count as full. So, you can charge your juice pack 10% of the way 10 times before it counts as a complete cycle.) Don't be afraid to top it off!

What are the benefits of switching the juice pack to standby mode?

Using the standby switch will give you even more total battery life, as the phone uses additional power to be on a constant charge.

Can I sync my phone while the juice pack is still connected?

You can charge and sync your phone without removing it from its juice pack via the included micro USB cable.

What is mophie's return policy?

mophie reserves the right to claim a 20% restocking fee upon return. (For a full "Return Policy," please go to mophie.com)

Will I always receive double the battery life with my juice pack?

We cannot guarantee that you will receive double the battery life. The amount of additional battery you will receive depends on a variety of factors that are different for every user.

Does the juice pack block the speaker, microphone or cameras?

Of course not! The juice pack features a speaker chamber with acoustic routing to keep speakerphone audio clear.

Does the juice pack interfere with antenna reception?

Not a chance.
