

welcome

Thank you for purchasing the mophie juice pack™. You will now be able to travel great distances; be the master of your own destiny, no longer bound by the limitations of your iPhone. Lets get Juiced!

features

The mophie juice pack™ enables up to twice the battery life than the standard iPhone battery and offers a comfortable ergonomic design with a soft-touch non-slip finish.

Here's a rundown of why the juice pack™ is so fantastic:

1. (Take a breath) Ergonomic non-slip comfort-grip soft-touch form-fitting impact-resistant iPhone case.
2. Integrated rechargeable lithium polymer battery. (Much safer than those troublesome lithium-Ion batteries).
3. State of the art battery technology doubles your talk time... this battery rocks.
4. Integrated 4 light LED status indicator. Indicates charging mode and current battery life. Know before you go.
5. Pass-through dock connector allows you to charge your juice pack™ with any standard iPod connection, and charge your iPhone and juice pack™ at the same time. Really, you don't every have to disconnect the juice pack™.
6. Rechargeable for over 500 cycles. (Full cycles, partial cycles don't count as full. So, you can charge your juice pack™ 10% of the way ten times before you get to a complete cycle. Don't be afraid to top it off.)
7. Smart battery technology actually instructs the iPhone to drain out the juice pack™ first. When you're done with the juice pack™ you can pull it off and still have a fully charged iPhone.
8. Built-in short circuit, over-charge and temperature protection. Safety First!

compatibility

While the juice pack™ comes with a standard iPod connection pin, this battery is solely intended for use with the First Generation Apple iPhone. If you try it with anything else and things go haywire – we can't help you out.

warranty

At mophie, we are dedicated to making the best quality products we can. To back this up, your juice pack™ is warranted for 1 full year from the date of purchase.

charging your juice pack™

Connect the juice pack™ to a power source or USB cable using the 30-pin cable that came with your iPhone and attaching it to the 30-pin receptacle located on the bottom of the juice pack™. The LEDs located on the back of the device will blink when charging, as the juice pack™ becomes more charged the LEDs will indicate how full it is, but one LED will remain blinking until completely full.

Note: If the connector seems difficult to insert, you may have to turn it over/around. The pin connector on the juice pack™ is the opposite direction than the pin connector on the iPhone.
Note: In addition to being able to charge directly from the cable that came with your iPhone, many third party iPod/iPhone accessories are also able to charge the juice pack™.

important

Charge your juice pack™ the FIRST time for a full 8 hours. After the initial charge, normal charging will only take 3 to 4 hours for Maximum Power.

To keep your juice pack™ operating to its fullest potential, make sure to do the following:

1. Re-charge your juice pack™ once every three months when not in use.
2. Keep your juice pack™ dry and away from moisture and corrosive materials.
3. Do not wash the juice pack™ with harsh chemicals, soaps or detergents.

package contains

- mophie juice pack™
- user manual

charging your iphone using the juice pack™

If your iPhone is drained of power or if you want to double the battery life of your iPhone, simply slide the iPhone into the juice pack™. Make sure that the pin connector is securely inserted into the bottom of the iPhone.

When the iPhone recognizes the juice pack™, a battery symbol will appear on the screen and you will hear a chirp from the iPhone, this indicates that the iPhone is charging and/or using the power from the juice pack™ rather than from the iPhone itself. If your iPhone is drained of power the juice pack™ will charge your iPhone, if your iPhone is fully charged, the juice pack™ will act as your primary battery and no power will be lost from the iPhone internal battery.

checking the status of the juice pack™

To check the status of the juice pack™, press the button located on the lower back of the device. There are four LEDs that will illuminate. Four LEDs means that the juice pack™ is fully charged and one LED means that it is almost empty. The LEDs will go out after several seconds.

warning

Read all instructions and warnings prior to using this product. Improper use of this product may result in product damage, excess heat, toxic fumes, fire or explosion, for which damages you ("Purchaser"), and not mStation or mophie (collectively "Manufacturer") are responsible.

- ⚠ Do not store battery in high temperature environment, including intense sunlight heat. Do not place battery in fire or other excessively hot environments.
- ⚠ Be cautious of excessive drops, bumps, abrasions or other impacts to this battery. If there is any damage to the battery such as dents, punctures, tears, deformities or corrosion, due to any cause, discontinue use and contact manufacturer or dispose of in an appropriate manner.
- ⚠ Do not disassemble this battery or attempt to repair or modify it in any manner.
- ⚠ Do not expose this battery to moisture or submerge it in liquid. Keep battery dry at all times.
- ⚠ Do not attempt to charge battery using any other method, apparatus or connection other than the device's 30-pin connector. For questions or instructions for the various ways to charge the juice pack™ refer to the product's User Manual.
- ⚠ Do not attempt to replace any part of this battery.
- ⚠ If this battery is intended by Purchaser to be used by a minor, purchasing adult agrees to provide detailed instructions and warnings to any minor prior to use. Failure to do so is sole responsibility of purchaser, who agrees to indemnify Manufacturer for any unintended use or misuse by a minor.
- ⚠ All batteries have gone through a thorough quality assurance inspection. If you find that your battery is excessively hot, is emitting odor, is deformed, abraded, cut or is experiencing or demonstrating an abnormal phenomenon, immediately stop all battery use and contact Manufacturer.
- ⚠ For extended storage, first charge your battery for one hour.
- ⚠ Never dispose of batteries in the garbage. Disposal of batteries in the garbage is unlawful under state and federal environmental laws and regulations. Always take used batteries to your local battery recycling center.

legal

This Battery is meant for use only in conjunction with the appropriate mobile entertainment device. Please consult your device packaging to determine whether this Battery is compatible with your particular mobile entertainment device. Manufacturer is not responsible for any damages to any mobile entertainment device incurred through the use of this product.

Manufacturer shall not in any way be liable to you or to any third party for any damages you or any third party may suffer as a result of use, intended or unintended, or misuse of this Battery in conjunction with any device or accessory other than the appropriate mobile entertainment device for which this battery is designed. Manufacturer will not be responsible for any damages you or any third party may suffer as a result of misuse of this Battery as outlined above. If you are responsible for battery use with an unintended mobile entertainment device and damages result from such use, you agree to indemnify Manufacturer for any resulting injuries to any third part(ies). mophie and juice pack are registered trademarks of mStation Corporation. iPhone and iPod are registered trademarks of Apple, Inc.
